### DETAILED ACTION

1. Claims 1-4,6 and 10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Prolifke et al (5,507,918).

Prolifke et al shows the claimed loading device structure in figures 10 and 11. The moveable loading member reads on element 9J or the combination of elements 9J and 27A in Figure 10 which is arranged or structured to move vertically; element 9K or the combination of elements 27A and 9K in Figure 11. Base member reads on 58/57 in Figure 10, 57A and 58B in Figure 11. Means for introducing pressure medium to generate vertical movement reads on 24A pressure cushion in Figure 10 and 11. In regard to claim 4, the claimed supporting bearings reads on the roller support structure 51 in Figure 10, 57A and 58A in Figure 11. Although not numbered, the rollers are drawn with axles or axial support in the figures.

Prolifke et al anticipates the invention to the extent claimed or at the least, Prolifke et al obviously shows the claimed invention.

2. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Prolifke et al (5,507,918).

It would have been obvious to provide a plurality of rollers as it would have been obviously dependent on the width of the paper making machine.

3. Claims 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Chin whose telephone number is (703) 308-2046. The examiner can normally be reached on Monday through Friday.
